ENTREPRENEUR & BUSINESS LEADER

Thirty years of experience as entrepreneur and business leader. A Decisive leader who grew his construction company to be one of Sri Lanka's leading construction companies through effective strategic planning, creative sales techniques, efficient marketing and a highly motivated team of employees. Successful in building relationships with top decision makers and delivering on customer commitments. Proven track record of improving revenue and growing profit while spearheading operational improvements to drive productivity and reduce costs. Passionate about contributing to the development of the Construction industry in Sri Lanka through active participation in multitude of trade organizations.

EXPERIENCE

I, P.H. Ruwan De Silva Chairman / Managing Director of Sripalie Contractors (Pvt) Ltd, have dedicated more than 30 years towards the family run construction company since 1985. Becoming the Chairman / Managing Director after the demise of my father P.H. Gilbert De Silva, I led the firm to become the ICTAD - C1 grade along with my two brothers P.H. Chandana De Silva and P.H. Rishantha De Silva.

SRIPALIE CONTRACTORS (PVT) LTD. was founded by my father who was a well-respected businessman in Galle, Sri Lanka. Right after completing National Diploma in Technology course from the German Technical Institute, I joined my father's business as his assistant. During this time, our business was experiencing financial difficulties. Under my father's guidance and with the help of my brothers, we managed to recover from our losses and build the business to a respectable position. After my father's untimely death in 2009, I and my brothers were forced to take over the business. I am happy to note that we have been able to steer the company to achieve continuous growth to become one of the most admirable and sought after construction companies in Sri Lanka. We are ISO 9001:2008 certified and has been accredited as a C-1 Grade construction company in Sri Lanka.

Under my guidance, the company has secured many projects across the country. We had the opportunity to construct a Grand Stand Pavilion Building complex in the world famous Galle.

International Cricket Stadium. In spite of adverse weather conditions that was prevailing at that time, we managed to complete this project within 90 days. Other notable projects that we have carried out being, Tsunami memorial museum at Hikkaduwa, Southern province Chief minister's office building (Dakshina Paya) at Galle, Construction Advanced Technological Institutes at Tangalle & Rathnapura, Hambantota Hospital, SAARC cultural centre at Matara and Rajarata university building at Mihintale.

At present, the company employs more than 400 personnel and over 100 qualified technical personnel. The following awards and recognitions that we have received provides ample testimony to the standing of the company in the industry.

INVOLVEMENT WITH TRADE ORGANIZATIONS

Notwithstanding my busy schedule of business activities, I have allocated my time on following institutional and social activities by having their memberships to fulfill social responsibilities while enhancing my own personality among the others.

National Construction Association of Sri Lanka

Following my father's footsteps, I had been serving as an active member of the Southern Branch of the National Construction Association of Sri Lanka (NCASL). Indeed I am happy to state here that during my tenure as the Secretary of the Southern branch of the association in 1994, we organized the construction exhibition (Construct) at Galle for the first time. I initiated and played the leading role in organizing this exhibition. Today, it has reached international standards and is participated by both Sri Lankan and international construction companies. I consider it as the outcome of a foresight management decision taken by me which resulted in new construction technologies and construction related education being introduced in the country. Also during my tenure as the Chairman of the Association, in collaboration with the UNDP, we organized many workshops and programmes to construction related personnel with the view of helping them to enhance their qualifications and knowledge.

In addition to serving as the Chairman and Secretary of the association respectively, I also served as a member of the Board of Directors of the NCASL, Southern branch. I had developed a strategic plan for the association along with Scandinavian voluntary experts and launched capacity building programmes to the members and the professionals in Galle. I was instrumental in obtaining a building to house the NCASL Southern Branch where the association continues to operate till today.

In addition to the above, I also held the position of Vice Chairman for three years and represented the Executive board for four years at the National body of the NCASL. Presently I serve as a Director of the National Construction Association (NCASL) national body.

I also had the opportunity to be the Executive Director of the Galle Chamber of Commerce for four years and the Chamber of Construction Industry for one year.

Ceylon Institute of Builders

In 2008, I along with a few well known personalities in the industry, managed to re-organize Ceylon Institute of Builders (CIOB). I became the Vice President of CIOB and continues to serve the institute in that capacity till today. I consider this as a mile stone in the Sri Lankan construction industry as we introduced industrial qualifications for aspiring building professionals.

Apart from this, under our leadership, CIOB, in association with the Department of Architecture of the University of Moratuwa, organized the World Construction Symposium 2012 in Sri Lanka with delegates participating from other countries. It was my key responsibility to organize and invite academics and industry professionals for this

Symposium which we managed to do through my international and local relationships. Since then the World Construction Symposium has become an annual event and now considered to be a prominent international conference held in Sri Lanka. I also served as a member of the organizing Committee of the second world Construction Symposium in 2013. I have organized Sri Lankan delegations to China, Vietnam and Singapore which shows my event organizing capacity. I have also participated in many international forums.

Presently I am holding the position of the designated contact for International Council for research and innovation in building & construction (CIB) Netherland.

Cricket Association

I have been an active member of the Southern Province Cricket Association since 2010. As a member of the International Cricket Tournament organizing committee, I was involved in organizing international matches as well as local cricket tournaments in Southern Province.

Others

I have the honour of serving as the Co-Chairman for the “Mahabhimani 2013” organized jointly by ICTAD & Ministry of Construction and Engineering Services which was held under the patronage of the then President of Sri Lanka, his excellency Mahinda Rajapaksha as the chief guest. The event was organized to uplift and encourage the construction work force.

AWARDS & HONOURS

Company

The company was awarded the **Gold award in the Construction Sector** category & **1st Runner-up in the Large Sector** at the prestigious **National Business Excellence Awards (NBEA) 2019** organized by National Chamber of Commerce in 2017.

Self

Recognizing my role in the construction industry, I was honoured with the National Award of “Nirmana Abhinandana – Shramabimani” by Shramabimani National Organization in year 2012.

At the 22nd edition of the Sri Lankan Entrepreneur of the Year awards organized by the Federation of Chambers of Commerce and Industry in Sri Lanka, I was awarded the Bronze award in the National Level (Extra Large Category) and Silver Award in the Provincial Level (Extra Large Category). The award ceremony was held on Mar.10th 2017 at Hilton Residencies and was graced by the President, His Excellency Maithripala Sirisena as the Chief Guest. In fact, I have been regularly participating in this event for many years. In 2004, I received the award in the Small category. But, in 2017, I managed to bag the award under the extra-large sector category. This is a testimony to the impressive growth that I have been fortunate to achieve over the years.
